70 WATTS

FEATURES:

- RoHS Compliant
- 36-72 VDC Input
- Advanced SMT Design
- Compact 2.5" x 4.5" x 1.2" Size
- 2 Year Warranty
- One to Four Outputs
- 4242 VDC Reinforced Insulation

OPEN FRAME

EN 60950-1 ITE Certification
EN 60601-1 Medical Certification

• Fits 1U Applications

- Size & Pin compatible with
- Rel-70 Series • Optional Chassis and Cover

DC4-70-1008

Consult factory for alternate output configurations.

48V/1.5A

Consult factory for positive, negative or floating outputs.

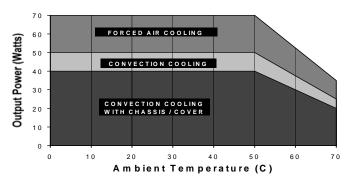

Refer to Applications Information for complete output power ratings.

All specifications are maximum at 25° C, 70W unless otherwise stated, may vary by model and are subject to change without notice.

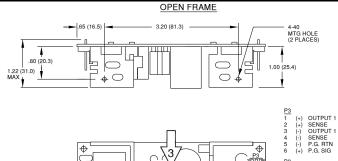

Specify optional chassis and cover, power good or reverse input protection when ordering.

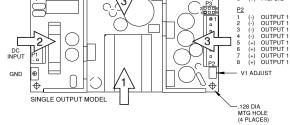

OUTPUT SPECIFICAT		Commention Conclude	
Total Output Power at 50°C	50W	Convection Cooled

MAXIMUM OUTPUT POWER VS. AMBIENT TEMPERATURE

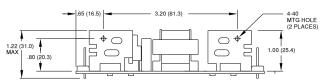

DC4-70 SERIES MECHANICAL SPECIFICATIONS

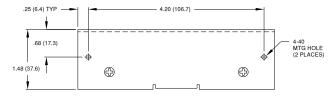

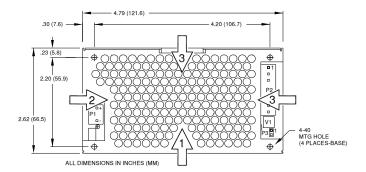

APPLICATIONS INFORMATION

- 1. Rated 10A maximum with convection cooling.
- 2. Rated 1.5A maximum with convection cooling
- Total power must not exceed 50 watts with convection cooling on open frame models except where noted.
- Total power must not exceed 70 watts with 300 LFM forced air cooling on open frame models.
- 5. Total power must not exceed 40 watts with convection cooling and chassis/cover option.
- Total power must not exceed 70 watts with 300 LFM forced air cooling and chassis/cover option.
- 7. Each output can deliver its rated current but total output power must not exceed maximum power as determined by the cooling method stated above.
- Sufficient area must be provided around convection cooled power supplies to allow natural movement of air to develop.
- 300 linear feet per minute of airflow must be maintained one inch above any point of the heatsink in the direction shown when forced air cooling is required.
- This product is intended for use as a professionally installed component within information technology and medical equipment.
- A minimum load of 10% is required on output one to ensure proper regulation of remaining outputs.
- Remote sense terminals may be used to compensate for cable losses up to 250mV (single output models only). The use of a twisted pair is recommended as well as a decoupling capacitor (0.1 - 10μF) and a capacitor of 100μF/amp connected across the load side.
- Peak to peak output ripple and noise is measured directly at the output terminals of the power supply, without the use of the probe ground lead or retractable tip, 20 MHz bandwidth.
- 14. This product was type tested and safety certified using the dielectric strength test voltages listed in Table 6 of IEC 60601-1:2005. In consideration of Clause 8.8.3, care must be taken to insure that the voltage applied to a reinforced insulation does not overstress different types and levels of insulation. Primary and secondary to ground capacitors may need to be disconnected prior to performing a dielectric strength test on the power supply or the end product. It is highly recommended that the DC test voltages listed in DVB.1, Annex DVB of UL 60601-1 1st Edition are not exceeded during a production-line dielectric strength test of the assembled end product. Please consult factory for further information.
- 15. This power supply has been safety approved and final tested using a DC dielectric
- strength test. Please consult factory before performing an AC dielectric strength test.
- Maximum screw penetration into bottom chassis mounting holes is .100 inches.
 Maximum screw penetration into side chassis mounting holes is .250 inches.
- Maximum screw penetration into side chassis mounting holes is .250 miches.
 To meet emissions specifications, all four mounting hole pads must be electrically
- connected to a common metal chassis. Chassis/cover option recommended.

CONNECTOR SPECIFICATIONS

P1	DC Input	.156 friction lock header mates with Tyco 640250-3 or equivalent crimp terminal housing with Tyco 3-640706-1 or equivalent crimp terminal.
P2	DC Output (Single)	.156 friction lock header mates with Tyco 770849-8 or equivalent crimp terminal housing with Tyco 3-640707-1 or equivalent crimp terminal.
P2	DC Output (Multiple)	.156 friction lock header mates with Tyco 770849-8 or equivalent crimp terminal housing with Tyco 3-640707-1 or equivalent crimp terminal.
G	Ground	.187 quick disconnect terminal.
P3	P.G./Sense (Single)	.100 breakaway header mates with Molex 22-55-2061 or equivalent crimp terminal housing with Molex type 71851 or equivalent crimp terminal.
P3	Power Good (Multiple)	.100 breakaway header mates with Molex 50-57-9002 or equivalent crimp terminal housing with Molex type 71851 or equivalent crimp terminal.

RECOMMENDED AIR FLOW DIRECTION
